BRINA

Matt nanotechnology finish, with a peach-skin effect. Contemporary matt shades for current projects.

Brina leather uses a nanotechnology finish that gives a matt surface and a velvety peach-skin effect: the reflection changes with the light, while the touch stays soft and natural. A palette of on-trend matt shades, designed for furniture and accent pieces with a current language, where the leather has to take the lead without shining. Matt is the whole point of this leather: it absorbs reflections instead of returning them, which is why it holds up under the spotlights of a showroom or a reception space. On small accessories the peach-skin effect is felt at the first touch.
