CAMOSCIO

Effetto scamosciato double face, mano asciutta e superficie compatta: il nubuck senza la pelle.

Camoscio è un double face dall'effetto scamosciato: la superficie è morbida e vellutata al tatto e richiama da vicino l'aspetto del nubuck, ma la struttura sotto è tecnica e compatta. La mano resta asciutta, mai gommosa, e la lavorazione double face dà al colore una profondità che i tessuti a una faccia non hanno. È la scelta di chi vuole l'aspetto dello scamosciato senza gestirne la manutenzione: il trattamento idrorepellente contrasta i liquidi e la struttura compatta regge lo sfregamento quotidiano.
